Some remarks:

- Read the questions carefully before you start to answer the questions.
- Answer the questions as structured as possible within the space provided.

Good luck!

---

1. Provide the semantic meaning of the following HTML-elements and indicate (circle) whether the elements are an inline or a block element.

hr		inline / block
code		inline / block
select		inline / block

2. List three self-closing and three non-self-closing HTML tags.

1. Self-closing:

2. Non-self-closing:

3. Explain: what is the HTML doctype?

4. Explain the following CSS selectors target:

1. #main

2. .main

3. .main p

5. Describe what the following CSS rule accomplishes: `body { color: red; }`

6. Do the following PHP statements evaluate to *TRUE* or *FALSE*? Circle the correct answer. (2p)

<code>15 % 5 == true</code>	TRUE	/	FALSE
<code>1 &gt; 0 and true or false</code>	TRUE	/	FALSE
<code>'1 ring to rule them all' != 1</code>	TRUE	/	FALSE
<code>true == ''</code>	TRUE	/	FALSE

7. When executing a PHP script from the command line, which special variable holds the parameters provided on the command line?
8. Provide the command to start a PHP web server.
9. Describe the difference between the *file* and *file\_get\_contents* PHP functions.
